

National Home Gardening Club approves Skeeter Defeater®

June 9, 2009

The National Home Gardening Club, America's standout community for passionate home gardeners, has bestowed its prestigious Gardening Club Member Tested and Recommended Seal of Approval to the Skeeter Defeater® Mosquito Defense Unit. The Skeeter Defeater products will be featured in the July/August issue of *Gardening How-To* magazine, the official publication of the National Home Gardening Club.

Skeeter Defeater samples were sent to 60 members of the club this past spring. Testers had a chance to use the automatic mosquito sprayer for an extended period of time in real-life scenarios before turning over their opinions to determine the approval of the Skeeter Defeater.

The results were impressive.

As one member expressed, "Once you set the dawn to dusk button there's nothing else to do except hang it near the area you want covered. The remote control makes it effortless to spray additional times if needed. I attract mosquitoes so the coverage makes it such a pleasure to sit on my back porch without being eaten alive! I love it!!"

Overall, the members scored the Skeeter Defeater product at 8.5 out of 10. The highest scores were given for the product's ease of use, clarity of instructions, appearance and overall quality.

The Skeeter Defeater Mosquito Defense Unit sprays a botanical insecticide, pyrethrin, at dusk and dawn automatically everyday using its patent-pending DUSK/DAWN® Sensor. The sensor measures the sunlight and activates the Dispenser at precisely true dusk and dawn, when mosquitoes are most active. The spray kills mosquitoes on contact, unlike many other mosquito control devices that merely trap or repel mosquitoes. Each spray covers up to 300 square feet. The

Dispensers are battery-operated, making the unit portable and ideal for camping, RVing, hunting and more outdoor settings.

Skeeter Defeater products launched in May 2008 and are currently available in many Ace, True Value and other hardware stores, as well as on HomeDepot.com and SkeeterDefeater.com, among other outlets. Each Dispenser costs \$69.95 and each Cylinder Refill Unit retails for \$12.95.

The National Home Gardening Club offers members the opportunity to participate in their active online forums to discuss tips and techniques with other members, enter contests to win gardening tools, access to special member deals and much more. You can find out more at GardeningClub.com, or in *Gardening How-To* magazine.

Additional Skeeter Defeater® Reviews:

"Totally user friendly. Automatically sprays at sunrise and sunset when mosquitoes are the most active, killing them so they do not return."

- Carol T.

"As a South Floridian, I know the value of a good mosquito product. In a water paradise, such as we live in, it is virtually impossible to get a step ahead of the "blood suckers." As irony would have it, our son is very allergic to mosquito bites. This product helps so much and the on demand spray helps ensure that the area is at least less mosquito-y than without. I will probably use more cans than the average person but it's still a life-broadening life-saver for our littlest gardener. He's so happy now!"

- Virginia S., Florida

"I would recommend this product for those who like to use their decks in the summer. It does keep the mosquitos down."

- Lori S.

"I was finally able to sit on my front porch in the evening."

- Alan H.
