

Understanding the Indicator Light

The Dispenser uses the Indicator Light to inform you of three key messages.

1. Power On Indication: the Indicator Light will blink once when the Power Switch is set to Remote Only (left), and twice when set to DUSK/DAWN® + Remote (right).
2. The Indicator Light will blink progressively faster for 6 seconds prior to the Dispenser spraying, and will remain lit while spraying.
3. The Indicator Light will blink once every 4 seconds to indicate a low level of insecticide left in your current CRU.

The DUSK/DAWN Sensor is also located in the same area as the Indicator Light, on top of the Spray Head.
